

Double Edge

Mini Edge

Feel the PAPillow™ Difference!

The patented design of the PAPillow™ has solved CPAP compliance issues for thousands of CPAP users. Shipping available on all products and equipment.

- Helps prevent mask leaks and sore spots
- Improves comfort and CPAP compliance
- Helps you to achieve a good night's sleep
- Designed by CPAP users, for CPAP users

All PAPillows Feature:

- Sturdy construction, high quality interlock-knit
- Proper support for neck and head
- Accommodates both left or right side sleeping
- Comfortable, hypoallergenic synthetic down fill
- Quilted side panel prevents edge collapse
- Machine washable, cool dryer safe
- Fitted pillow case included

PAPillow™ - Sleep on The Edge!

CPAP user with a standard bed pillow

CPAP user with a standard bed pillow

CPAP user with a PAPillow

Mask issues are one reason why so many patients fail on CPAP therapy. As the head sinks down into a standard bed pillow, it can push the mask off center and cause a leak.

Pressure point soreness often occurs when the mask frame or headgear are uncomfortably forced into the side of the face. Blocked mask exhalation ports can cause dangerous carbon dioxide levels within the mask.

The end result is another night of poor sleep and unsuccessful CPAP therapy.

The PAPillow™ Difference

Designed by CPAP users, for CPAP users, this unique and patented pillow features a quilted side panel that creates a distinct edge allowing the mask to extend beyond.

"Sleep on the edge" to reduce or eliminate the common compliance problem of mask leak and pressure point soreness. For side or stomach sleepers.

All PAPillows Feature:

- Sturdy construction, high quality interlock-knit
- Proper support for neck and head
- Accommodates both left or right side sleeping
- Comfortable, hypoallergenic synthetic down fill
- Quilted side panel prevents edge collapse
- Machine washable, cool dryer safe
- Fitted pillow case included

Double Edge PAPillow

Stomach sleeping with the Double Edge PAPillow™

Side sleeping with the Double Edge PAPillow™

For additional elevation, the Double Edge PAPillow™ can be placed on top of any regular pillow.

Mini Edge PAPillow™

The Mini Edge PAPillow™ benefits adults or children who use CPAP, prefer a smaller pillow, wear braces or night time dental appliances. The Mini Edge, like the Double Edge size, can be placed on top of a regular bed pillow if additional elevation is needed.

The Mini Edge is also a great size for travel.

EasyCare Double Edge PAPillow

The same great pillow with a new easy care, medical grade, fluid proof shell for use by:
Home * Hospital * Nursing Home * Sleep Lab

- When disinfection is necessary between patient use
- To assist with valid CPAP titration in the hospital sleep lab setting
- For home use with patients who experience drooling or wish to disinfect shell
- For ease when used in lap for baby support while breast or bottle feeding
- Super Soft Derma-Plus Fluid Proof Shell
- Bacteria, Fungus and Stain Resistant
- Easy to disinfect

EasyCare Double Edge PAPillow

Insulated Tubing Cover with Zipper! No more struggling to get the tubing in the cover!

An insulated tubing cover is a unique item that improves the efficiency of CPAP humidifiers, especially in cooler bedroom environments. By insulating the CPAP tubing, you can minimize or eliminate "rainout," the excess condensation that can build up inside your CPAP tubing and mask, causing compliance problems.

Our tubing cover, constructed of high loft polyester fiberfill and cotton polyester blend fabric with diamond-quilted pattern, maintains an airy fiber loft and soft touch. This combination provides more insulation and is superior to other tubing covers that only offer a single layer of fabric. The finished tubing cover length is approximately 69" which accommodates most standard tubing. The full zipper opening allows for easy tube insertion.

New and easy assembly: Open the package and unfold the tubing cover. Lay the tube inside the cover and zip closed. We suggest attaching the zipper pull end to the mask and finished edge to the machine.

Clip: Fasten the black Velcro® wrap around the tubing cover. Secure clip to bottom bed sheet at the location of your choice to help keep the tubing positioned to prevent tugging on your mask .

Washing Instructions: Machine wash and dry. Warm water temperature and non-chlorine bleach are acceptable. Place in a laundry bag to prevent tangling with other items.
